Sexto 2 - Architecte

Question 1 - Comment puis-je résumer les étapes de la méthode Sexto?

I would follow the protocol by gathering information by the youth who disclosed the information to me. I would then continue the steps with the victim and witness(es). After completing the first steps, I could determine if the intention of the case was malicious or impulsive. If the intent was malicious, I would call the police and confiscate the phone. If the case was impulsive, I would still reach out to the police for guidance and follow ups. I would also call DYP if needed.

Question 2 - Qu'est-ce que je retiens des 3 mises en situation présentées?

I remember from the 3 scenarios is that having a quick response to the incident is important to prevent the distribution of the images. It is always best to collect as much information as possible to make sure you everything is valid and accurate. I would act as a support for everyone involve and provide as much education as I can.

If a youth comes to see me about an incident, I would follow the Sexto intervention plan right away and follow the steps. Although, if parents have come forward about their child, I would need to refer them to the police.

Question 3 - Quelle étape me semble la plus délicate lors de l'application de la méthode Sexto?

The step that seems the most delicate to me would be if the incident involves many people and having to navigate talking to all and validating the information given. I would also have to remain neutral and provide support to all which could be a bit difficult. I think also having to talk to parents and supporting them through the incident could be delicate as well.
