

Preuve et attestation de développement professionnel

Sexto response kit 1 - Explorateur

Description:

For legal reasons, the use of the SEXTO kit is reserved exclusively for Quebec's education sector personnel. In addition, its use must be the subject of a prior agreement between the police force that serves the territory where the school is located and the Director of Criminal and Penal Prosecutions (DCPP). Please note that an attestation badge will only be attributed to personnel at education institutions in a territory where such an agreement has been concluded. Before completing the training program, it is therefore recommended that you validate this information with your superiors or your police force...

Preuve et attestation de développement professionnel

Sexto response kit 1 - Explorateur

Question 1 - What have I learned from the Sexto intervention method?

I learned that there is an order to dealing with such incidents. It gives us a structured protocol to be able to know what the next steps are. The importance of completing the incident evaluation grid. This tool helps identify the trigger, nature, intentions, scope, and type of involvement of every student that is involved. Each student gets a separate grid without being by others. I also learned the importance of distinguishing between an impulsive act and a malicious act. One must consider the ages of the students, their intentions, the distribution of images, the number of people involved, and the consequences of their actions. The situation should be handled differently according to the circumstances.

I must never view or request to see potentially explicit images. If there is reason to believe that such images are on a student's electronic device, the Sexto procedure for confiscating the device must be followed without viewing the images. I did not know we get to confiscate it and that if the student refuses to give the device then we must call the police.

Question 2 - What will this training change in my future interventions?

This changes how I handle situations but most importantly, increases the efficiency and speed of interventions to avoid the dissemination of images which may constitute child pornography and reduce consequences for the young people involved. This is super important as we can see through statistics that technology is inevitable and distribution is rapid.

I think it will help with future interventions as it allows me to help reassure those working around me and support the people involved during meetings with teenagers and their parents. This training removes the ability to react instantly or impulsively but rather through a structured/objective protocol. This training has also helped me understand the importance of recognizing when a situation may involve a malicious act. If I believe that the situation involves harassment, threats, extortion, revenge, or the deliberate distribution of images to cause harm, I must contact the police immediately because statements made to a teacher like myself, may have implications in legal proceedings, which we want to protect not tainting any evidence. This helps with my future as it instills greater confidence in myself to be able to handle this type of situation.

Au coeur de votre stratégie #DevProf

Question 3 - What will be my focus with the students when I have to intervene?

My focus in wanting to get this training is the same reason for wanting to be an educator, to educate and protect the vulnerable group (teens). my priority has always been to ensure the safety and wellbeing of the student in collaboration with the resources they may need. If I were to have to intervene, directing them to the right people and allowing them to have the best possible outcome is of my priority. There is stigma and fear when a victim comes forward asking for help therefore, treating the situation with dignity, calmness and instilled protocols allows for them to safely followthrough with such difficult (and to what may seem impossible to them) situation. This applies to the perpetrator as well, as I will also ensure that students understand the importance of consent 9as taught in my CCQ class) and the potential consequences of their actions. Most importantly, I will now follow the Sexto protocol, protect students' confidentiality, and recognize when police involvement is necessary to ensure that the situation is handled appropriately. For all parties, addressing the situation without judgement,
