

Preuve et attestation de développement professionnel

Sexto response kit 2 – Architecte

Description:

For legal reasons, the use of the SEXTO kit is reserved exclusively for Quebec's education sector personnel. In addition, its use must be the subject of a prior agreement between the police force that serves the territory where the school is located and the Director of Criminal and Penal Prosecutions (DCPP). Please note that an attestation badge will only be attributed to personnel at education institutions in a territory where such an agreement has been concluded. Before completing the training program, it is therefore recommended that you validate this information with your superiors or your police force. This training program is designed to equip education sector personnel to act quickly and efficiently with the students in their institution who are involved in a sexting situation. Sexting among teenagers can be defined as the shared production, distribution, and redistribution of sexual content (photos, videos, etc.) via information and communication technologies. At the end of the Explorer level of this training program, you will be able to understand the phenomenon and guide those involved in the management of cases that could be brought to their attention through an intervention tool, namely the Sexto kit. At the Architect level, through interactive organized activities, you will be presented with three fictional cases of sexting in order to consolidate new learning and validate your interventions. The creation of the Sexto kit was made possible thanks to the collaboration of the City of Saint-Jérôme (Quebec), the Director of Criminal and Penal Prosecutions (DCPP), the Canadian Centre for Child Protection, the Crime Victims Assistance Centre (CAVAC), Commission scolaire de la Rivière-du-Nord, and Académie Lafontaine. The Sexto Kit training program was developed by CADRE21 and carried out thanks to the participation of Fédération des établissements d'enseignements privés (FEEP) and funding from the ministère de l'Éducation et de l'enseignement supérieur (Quebec ministry of education and higher education, or MÉES).

Sexto response kit 2 – Architecte

Question 1 - How can I summarize the steps of the Sexto method?

When an incident is reported that would require the use of the Projet Sexto kit, the person training in the Projet Sexto intervention method would activate the protocol.

The first step would be to help the student that is interviewed feel comfortable and explain the Projet Sexto purpose and process to them.

One evaluation grid per student involved in the sexting situation would then be completed. The only exception would be if malicious intent is presumed. If this is the case, the file should be referred to the police for police intervention.

Each student must be interviewed alone to ensure that the most accurate report of the incident is being reported.

Once a completed evaluation of the situation has been completed, it must then be decided if the situation should be referred to the police force for intervention. In most cases, a referral to the police is recommended.

Question 2 - What have I learned from the three situations presented?

I learned that most cases will be referred for police intervention, even if there is no crime being committed. The benefit of involving the police force is that they are able to educate the students and their families about the potential dangers of sexting and the sharing of intimate information/images.

I was surprised to see that no screening would be done with a student who is assumed to be of malicious intent. I thought the school would have some responsibility in confirming the facts of the story before bringing it forward to law enforcement. I think I understand why it might be important to refer the situation directly to police given that an intervention by the school could tip the person off and lead them to try to cover up their wrong doings.

Question 3 - Which step do I find the most delicate when applying the Sexto method?

I think that the interventions that will require the most care are 1) the initial introduction of the Sexto Project Toolkit and how it will be used. I think this might be intimidating to some students. If not done properly, it may prevent them from candidly sharing information about their situation. 2) convincing student and administration that contacting the police force is best practice in certain situations. I feel like students may worry about being involved with the police and how it will impact their future. I also think that administration will worry about the fallout from parents when involving the police. I think it will be important for us to find ways to reinforce the police's role as primarily educational and not punitive.
